Debajit Biswas

Full-Stack Engineer with focus on Back-End (LWD-26th March)

(+91) 8017952575 | Debajit.Biswas@outlook.com | iamdebajithere | Debajit Biswas

Professional Summary

Experienced software professional with 5 years in the full software development lifecycle, including design, development, deployment and maintenance of scalable solutions for various clients. A motivated team player and communicator, adept at requirements analysis and driving results in complex projects while collaborating effectively across teams.

Skills

Core Competencies: Software Design, REST API, Responsive UI, Database Schema Design,Object Oriented Programming(OOPs), Microservices
Programming Languages: C#, JavaScript, TypeScript, HTML, CSS, SQL, Python(Basic), Domain Specific Languages
Frameworks and Technologies: .Net, Entity Framework Core, XUnit, Angular, Jasmine, MS SQL Server, Elasticsearch, Azure DevOps, Azure Services, Docker, Test Driven Development(TDD), Agile
Familiar With: GraphQL,MySQL, React, SSIS, Power BI, ADF, Bicep, Linux, Infrastucture as Code(IaC)

Work Experience

Senior Software Engineer **LTIMindtree** 07/2022 - Present

- Led the development and deployment of multiple projects, leveraging .NET, Angular, SQL Server and Elasticsearch to build scalable and maintainable web applications
- Designed and implemented robust APIs and backend systems, enabling seamless integration with infrastructure, third-party services, and front-end interfaces
- Collaborated with cross-functional teams, driving technical decisions and delivering high-impact solutions with a focus on DevOps practices and streamlined deployment pipelines
- Ensured the reliability, security, and compliance of all systems, managing key aspects of hosting, security, and infrastructure configuration for optimal performance
- Demonstrated strong problem-solving and software engineering abilities, contributing to the success of complex, mission-critical systems

Software Engineer **Mindtree** 06/2020 - 06/2022

- Have been an integral part of the devops project providing real time solution and handling client requirements
- Worked on CRs, PTs, SIPs, in order to add new features, fix existing issue, performance improvement using my technology stacks
- Identified area of improvements , bugs proactively and fixed the same hence contributed in lowering the manual efforts for team

Trainee **Mindtree** 01/2020 - 05/2020

- Built foundational skills in .NET, Angular, and MS SQL Server through dedicated self-learning, setting a strong base for technical growth
- Developed a collaborative approach, working closely with team members to successfully deliver a full end-to-end demo e-commerce application

Projects

Samit Roy Welfare Foundation Application **NGO** 09/2024 - Present

- Leading the development of the primary website for the non-profit organization, focused on promoting the foundation's cause and supporting donations, events, blogs, FAQs, and more
- Implemented a code-first approach, designing and developing the database schema and structure to streamline future development
- Applied a generic repository pattern to ensure consistent and scalable data access for various website modules, including donations and event management
- Developed an admin section for managing content, donations, and other website features, ensuring ease of use for internal users
- Played a key technical role in discussions and decision-making, collaborating closely with the NGO to align the website with their vision and needs
- Managed the hosting of the website and taken security measures

Datasheet Download Application **Client 1 of LTIMindtree** 02/2024 - 09/2024

- Led the project from requirements gathering to post-go-live support, ensuring it met client specifications and compliance standards
- Designed and deployed REST APIs using Entity Framework Core for seamless database interactions, and created OpenAPI documentation to facilitate clear API usage and integration
- Developed a responsive, user-friendly UI, enhancing usability and ensuring a cohesive user experience across platforms
- Made informed decision when choosing Azure services, handling resource commissioning and implementing network security in collaboration with the cloud team
- Utilized AutoMapper for streamlined object mapping, authored SQL scripts for backend jobs, and performed rigorous unit testing with XUnit to ensure reliability and high code quality

Data Pipeline Monitoring Application **Client 2 of LTIMindtree** 11/2022 - 05/2024

- Contributed as a core member of the development team for a complex data pipeline monitoring application, ensuring reliability and performance of critical data processes
- Built and maintained REST APIs utilized in Azure Data Factory (ADF) pipelines, supporting seamless data flow and process automation
- Implemented Azure Queue messaging for eventual consistency, improving data reliability and system resilience through asynchronous processing
- Leveraged the CQRS (Command Query Responsibility Segregation) pattern with MediatR to separate read and write operations, enhancing scalability and performance for complex data interactions
- Configured secure authentication and authorization with Microsoft Entra ID and JWT, ensuring compliance with strict access control standards

Certification and Awards

AZ-900 - Azure Fundamentals, Microsoft December 28,2022

Recognised and praised by several clients for whom I have worked and got several internal awards within organisation for key contributions

Education

Meghnad Saha Institute of Technology Kolkata, India

Bachelor Of Technology in Electrical Engineering DGPA 8.09 2015 - 2019

Dakshin Chatra High School North 24 Parganas, India

High Secondary with PCM 77.00% 2014

Dakshin Chatra High School North 24 Parganas, India

Secondary 92.14% 2012
